

Luiza Potter Haussen, University College London

Luiza studied architecture and urban planning in Brazil and specialised in energy efficiency and resource management.

Prior to joining the MRes in Energy Demand Studies at University College London in 2017, she worked for 6 years in the energy and building sector. Companies included healthcare design architecture firms, consultancies for green building and a telecommunications company. She has taken part in over 100 efficiency projects and has also worked with water use and supply management inside corporations.

Luiza's research interests include energy modelling, water-energy-food nexus and passive design strategies for energy demand reduction.
