

Vincent Bensch, University of Wisconsin-Madison

Vincent Bensch is an undergraduate engineering student at the University of Wisconsin-Madison, where he is pursuing a double major in engineering mechanics and physics. He is currently completing a year of back-to-back internships at Lufthansa Technik in Hamburg and Aluminum GmbH in Nachrodt (both in Germany). He has interests in technical topics related to engineering designs, aerospace, and propulsion systems, as well as policy issues dealing with climate change, economics, and

electoral systems.

Vincent calls Madison his hometown, but brings an international perspective to his thinking. He is fully fluent in English and German and comfortable in both American and European contexts. He is a certified lifeguard, hobby photographer, and licensed amateur radio operator. In his spare time, he has participated on the University of Wisconsin's Badgerloop project, which is competing with other universities in the design of various aspects of Elon Musk's Hyperloop effort, and volunteered at WSUM (a campus broadcast radio station).
